

Claude Campus Ambassadors Application

First name	R Sai
Last name	Pranav
School name	Other
Are you 18 or older?	Yes
Are you eligible to work in the country where your university is located?	Yes
Are you a full-time student (12+ credit hours) or postdoc?	Yes
Are you an international student (i.e., not a citizen or permanent resident of the country where your university is located)?	No
University email	ugcet2300356@reva.edu.in
Personal email	rajasaipranav0@gmail.com
Phone number	+918217803545
What's your major?	Computer Science
What's your minor?	N/A - PhD/Postdoc
Expected graduation semester	Spring
Expected graduation year	2027
Are you planning to study abroad during the 2026–27 school year?	No
How many hours per week can you commit as a campus ambassador?	5-10 hours per week
Upload a copy of your resume	 bc92313a1e8e-R_Sai_Pranav__2.pdf

What's your current academic level?	Undergraduate student
Were you a Claude Campus Ambassador in the 2025/26 year?	No
What activities and student organizations are you currently involved with on campus?	I'm actively involved in several technical and cross-disciplinary student communities, including Google Developer Groups (GDG), AWS, Algorand, OSCode, and other campus technical initiatives. I'm also involved with the Student Council and participate in technical events, hackathons, workshops, peer learning activities, and cross branch initiatives focused on building and engaging the student community.
List any leadership positions you hold or have held in those organizations.	Technical Lead – GDG, AWS, Algorand, OSCode & Student Council; Head of Partnerships – Devnovate. I have led technical initiatives, workshops, hackathons, cross-branch activities, partnerships, and city level technical events.
Tell us about something you helped make happen on campus — an event, a club, a project. What was your role, and what was the result?	I've helped build technical communities on campus through GDG, AWS, Algorand, and other student initiatives, serving as a Technical Lead. I've organized workshops, hackathons, and peer-learning sessions, bringing students across branches together. Beyond campus, as Head of Partnerships at Devnovate, I've helped organize city-level and international events finding venues, building partnerships, collaborating with universities, speakers, and student communities, and coordinating teams. I enjoy turning ideas into real communities where people can learn, build, and connect.
Are you currently a formal ambassador, representative, partner, or lead for another company or program on your campus?	No
If you answered 'Yes' above, which?	N/A
Which AI tools do you currently use?	• Claude Code • Claude API • Claude (app) • Kimi
Describe one way you use Claude (or AI more broadly) that you think more students should know about.	Most students start every AI conversation from zero. I stopped doing that.

I run Claude Code against a persistent memory system I maintain like a codebase: 88 files, 271 cross-links, each fact labelled VERIFIED with the command that proved it or INFERRED. It spans a production SaaS I ship for a paying client, open-source patches, research code, and hackathon prep. Sessions open already knowing what broke last time and why.

The discipline is what I refuse to store. Wanting a low-token output mode, I found so many popular plugins with implausible star counts and copy that read like prompt injection aimed at an agent doing due diligence. I declined both and rebuilt the feature natively.

Memory makes AI compound. Unverified memory makes it confidently wrong. I've watched a stale note produce a confident, incorrect answer.

Build the first. Audit the second.

Have you built anything with Claude or the Claude API? If yes, share a link or a short description.*

What's something you've changed your mind about recently?

I thought open source meant volume. AI made patches cheap, so I shipped many. Four maintainers pushed back in ten days. One wrote: "we all have subsidized frontier LLMs today opening the PR is not the bottleneck." None said my code was wrong. They said it cost attention I hadn't earned. I'd inverted the economics: producing work is cheap now, reviewing it isn't. I went deep instead of broad. That maintainer now assigns me issues and reviews within hours.

Link to your personal website, if you have one.

What is your level of interest in social media?

- Very interested - I use it a lot already

Link to your LinkedIn profile

<https://www.linkedin.com/in/rsaipranav>

How did you hear about this program?

Google search

Which of these Anthropic student programs have you been a part of?

- Anthropic hackathon
- Claude Builder Clubs (CBCs)
- claude India community

Anything else you'd like us to know?

You've got my roles above, so I'll use this for what I'd actually do. Most student AI advice is prompt tricks. I'd run the opposite: one session on setting up persistent memory, labelling what's verified versus assumed, and deciding when not to call a model at all. Taught from real work an open source bug I proved before reporting it, and a production app a practising lawyer depends on daily. I'd rather 20 students change how they work than 200 sit through a talk.

By signing this form and submitting an application, you acknowledge that Anthropic will use your information to evaluate your application and run the Claude Campus Ambassadors program, including sharing it with our agency partner, which supports program operations on Anthropic's behalf.
